

BOROSILICATE GLASS TUBES

Chemical Composition:

SiO ₂	B ₂ O ₃	Na ₂ O + K ₂ O	Al ₂ O ₃
80.6%	13%	4%	2.4%

Area of Application:

1. Laboratory Glassware
2. Industrial Glass Piping and pilot scale components
3. Components in Instrumentation and control devices
4. Tubes for Heat Exchanger
5. Explosion-proof lamp housing and flow meters
6. Used for Pharmaceutical packagings
7. Interior Designing
8. Glass tube is used in cultivating plants and storing seeds
9. Decorative glasses, etc.

Sizes available from 5mm to 325mm
Heavy, Medium and Light Wall available in all sizes

Our Other Products:

Glass Tubes for Industrial Lighting

www.nobleglass.in

- Durable and Resistance to Chemical Corrosion
- Excellent Transparency and high Optical quality
- Seamless Tubes and no deposition on walls
- Very low Thermal Expansion & more thermal Shock resistant
- Environment Friendly
- Can be toughened thermally

Glass Tubes for Rotameter and Level Indicators
